

Prime32 Revision History

4.0.5

➤ **Client Code**

Client Codes have now been added to the Incorporation Companies Browse List. The facility to sort by Client Code has also been made available.

➤ **Client Contacts - eMails**

An email address can now be maintained for the Client and/or each individual client contact.

➤ **Client Notes**

Client Notes have now been added to the Client Codes Browse List.

➤ **Auto PostCode LookUp**

The default setting is LookUp Postcodes for addresses.

Users can switch off this setting via System > User > User Preferences
Click on User Defaults Tab.

➤ **Meeting Definition**

Prime32 will now warn users if a company's meeting definition contains officeholders that have now resigned.

➤ **Next Document Tracking No.**

Users can now set the next starting point for Document Tracking Entries.
(Refer Forms & Documents > ASIC Doc Tracking > click Set Next Doc No.
on menu function)

➤ **Locking Company Data**

The facility to lock a Company is now provided in Prime32.

This will ensure no accidental modification of Company Data.

A "Company Locked" field has been added to the Company Data – the default is Unlocked.

(Refer Corporate Register > Companies > Edit Company)

➤ **Data Transfer for Top 20 Shareholders**

When transferring EDGE data, Prime32 will now prompt if the Company notifies ASIC of Top 20 Shareholders Only.

This will ensure that the correct total issued is recorded in the Share Capital File, i.e Share Capital Totals will not be calculated from total Share Movements.

➤ **DeRegistered and Inactive Companies in Reports**

The option to exclude deregistered and/or inactive companies is now provided in the Prime32 Reports Manager. The default is set to Yes.
